PROFILE

Web Developer skilled in MERN stack, NestJS, and Linux, building interactive frontends, backend APIs, and real-time applications. Experienced with cloud services and collaborative projects, focused on creating scalable and user-friendly web applications.

EDUCATION

IOE Purwanchal Campus <i>Bachelor of Engineering in Computer Engineering</i> Pursuing B.E. in Computer Engineering	Dharan, Nepal 2024 — Present
Shikshadeep College <i>+2 Science</i> Completed +2 Science program with a focus on science and mathematics	Biratnagar, Nepal 2021 — 2023

SKILLS

- Programming Languages:** Python, C, C++, JavaScript, Go
- Web Technologies:** HTML, CSS, MERN Stack, Tailwind CSS, Node.js, Express.js, Nest.js
- Databases:** SQL, MySQL, MongoDB
- Data Science & Machine Learning:** NumPy, Pandas, Scikit-learn, Jupyter Notebooks
- Tools & Others:** Git/GitHub, Linux, RESTful APIs

PROJECTS

File Download Server - Designed and implemented a file download server using Go for internal file distribution within educational institution - Implemented network-based access control allowing downloads only when users are connected to the institution's local Wi-Fi network - Developed RESTful endpoints to handle secure file listing and download requests - Added request validation, error handling, and logging for reliability and monitoring	Jan 1, 2025 — Jan 5, 2025
Recipe Sharing Platform - Developed a full-stack web application that allows users to create, share, and browse cooking recipes - Built the backend using Node.js and Express.js with MongoDB for scalable data storage - Designed RESTful APIs for recipe creation, retrieval, updating, and deletion (CRUD operations) - Implemented a responsive frontend using React for dynamic recipe display and user interaction - Integrated form handling and API communication between the React frontend and Node.js backend	Dec 2025 — Ongoing
SOAP MERN Stack Application - Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React, Node.js) - Implemented both RESTful APIs and XML-based communication to handle data exchange between services - Built backend services with Express.js to process requests and interact with MongoDB - Designed a responsive React frontend for user interaction and dynamic data rendering - Integrated XML parsing and request handling to support SOAP-style data processing	Feb 20, 2026 — Feb 23, 2026
ML-Powered Post Recommendation System - Developed a full-stack post recommendation system combining the MERN stack (MongoDB, Express.js, React, Node.js) with FastAPI for ML services - Designed ML models to generate personalized recommendations based on user interactions: views, likes, and dislikes - Built backend APIs with FastAPI to serve recommendation results and integrate with the MERN frontend - Implemented frontend in React to display dynamic, personalized post feeds and capture user interaction data - Used MongoDB to store user profiles, posts, interaction history, and model outputs for real-time recommendations - Optimized system performance with efficient query handling, API integration, and scalable architecture	Feb 28, 2026 — Mar 11, 2026

Real-Time Group Polling System

Jan 15, 2026 — Feb 20, 2026

- Developed a real-time polling application where a group of users can vote on options (e.g., “Which place to eat lunch?”) and see results instantly
- Built backend services using NestJS and MongoDB to manage polls, users, and final results
- Implemented WebSockets for live vote updates and Redis to efficiently store votes and participant information in real time
- Designed a React frontend to display active polls, live voting updates, and dynamically highlight the winning option
- Stored final poll results in MongoDB for persistence and record-keeping
- Optimized system performance to handle multiple simultaneous voters with low latency

EXPERIENCE

MERN Mentor

Dec 17, 2025 — Dec 24, 2025

ACESS, IOE Purwanchal Campus

- Mentored students in building full-stack web applications using MongoDB, Express, React, and Node.js
- Guided students on frontend and backend development, debugging, and deployment best practices
- Conducted code reviews and provided technical feedback to improve project quality and student understanding

Technical Team

Mar 2, 2026 — Present

AWS Cloud Club, Purwanchal Campus

- Serve as a technical team member to plan, organize, and execute cloud computing workshops and projects
- Assist in configuring AWS services such as EC2, S3, RDS, and Lambda for student learning and club initiatives
- Support deployment of web applications, cloud labs, and internal club tools on AWS
- Collaborate with team members to troubleshoot issues, optimize cloud resources, and implement best practices
- Contribute to club initiatives by creating tutorials, guides, and hands-on exercises for students

Software Developer Intern

Mar 12, 2026 — May 26, 2026

MITRA Consultancy

- Worked as part of the Development Team, contributing to software development projects and internal applications
- Collaborated with developers on various development tasks and projects
- Demonstrated strong technical, problem-solving, and analytical skills while working on assigned responsibilities
- Assisted in developing, testing, and maintaining software solutions to meet project requirements
- Showed professionalism, dedication, creativity, and a willingness to learn new technologies and tools
- Took initiative in completing tasks and consistently exceeded expectations through quality work and attention to detail
- Contributed effectively to team objectives and made meaningful contributions to the Development Team

CERTIFICATIONS

Backend Development, Node.js Workshop

— Aug 8, 2024

- Attended and completed Node.js backend development workshop, learning backend service creation, routing, and API handling

Hackathon Participant, Hackathon

Jan 24, 2025 — Jan 26, 2025

- Issued by CS50xX Hack 3.0, IOE Purwanchal Campus
- Gained practical experience in Node.js backend development, project collaboration, and problem-solving

Backend Development & CLI Tools, Go

— Jan 5, 2026

- Gained hands-on experience building backend services, REST APIs, and command-line tools using Go

LANGUAGES

- Nepali (Native)
- English (Fluent)
- Hindi (Intermediate)
