EDUCATION

Bachelor of Computer Engineering

IOE Purwanchal Campus /
Dharan / January, 2024 -
Present

+2 Science

DAV College / Lalitpur / July,
2021 - May, 2023

SKILLS

- Programming: Python, C++,
JavaScript - Skillful
- AI/ML: NumPy, Pandas,
Scikit-Learn, Matplotlib,
Seaborn
- Web: HTML, CSS, Node.js -
Skillful
- Tools: Git, GitHub - Skillful

Navneet Mallick

Undergraduate Computer Engineering Student

3rd year Computer Engineering student at IOE Purwanchal Campus with a strong interest in Artificial Intelligence and Machine Learning. Experienced in building ML projects using Python, Pandas, and Scikit-learn.

ACHIEVEMENTS

-  **3rd Position – CS50x AI Nepal DataCamp Leaderboard**
Achieved 3rd rank among participants in the CS50x AI Nepal DataCamp leaderboard by completing AI and machine learning modules and exercises with strong performance.

EXPERIENCE

-  **Intern Supervisor**
CODE IT / Dharan / February, 2026 - Present
Supervised interns working on Data Science and Machine Learning projects and supported task coordination and progress monitoring.
-  **Graphics Designer**
ACES ERC / Dharan / February, 2026 - Present
Designing posters and visual materials for events and announcements, supporting communication and promotion within the committee.

TRAINING/CERTIFICATIONS

CS50x AI Nepal

IOE Purwanchal Campus / 2025

Completed the CS50x AI Nepal course covering foundational concepts of Artificial Intelligence and Machine Learning, including search algorithms, knowledge representation, optimization, and machine learning techniques.

JavaScript Essentials

IOE Purwanchal Campus / 2024

This training introduced me to essential JS concepts which enhanced my front-end skills

DataCamp Intermediate Python

2025

This course introduced me to intermediate Python concepts with a focus on dictionaries, logic flow, loops, and data visualization using Matplotlib.

DataCamp Intermediate SQL

2025

This course helped me to acquire proficiency in SQL with a focus on selecting data, filtering records, sorting, grouping, and applying aggregate functions.

Node JS Workshop

2025

Learnt the basics of Node JS in a one week workshop organised by TARANGA

PROJECTS

Movie Recommender System

Content-based movie recommendation system built using the TMDB dataset and cosine similarity. Implemented using Python, Pandas, and Scikit-learn to recommend similar movies based on metadata features.

<https://github.com/Navneet-Mallick/Movie-Recommender-System.git>

Car Price Predictor (Regression)

Built a machine learning model to predict car prices using regression techniques. Implemented using Python, Pandas, and Scikit-learn with data preprocessing, feature selection, and model evaluation.

<https://github.com/Navneet-Mallick/Car-Price-Predictor-Regression-.git>

Iris Flower Classification

Developed a classification model using the Iris dataset to predict flower species based on petal and sepal features using machine learning algorithms in Python with Scikit-learn.

<https://github.com/Navneet-Mallick/Flower-Classification-Project-.git>

Trash Online

Developed a digital waste management platform during a hackathon that enables scrap pickup scheduling, waste tracking, and sustainability insights.

<https://github.com/Navneet-Mallick/XENOM.git>
